

Earthquake Hazards

Legend

RELATIVE EARTHQUAKE HAZARDS

- High, Zone A
- Moderate, Zone B
- Low-Moderate, Zone C
- Low, Zone D

STATE DEPT. OF GEOLOGY AND MINERAL INDUSTRIES AND METRO REGIONAL SERVICES
DISCLAIMER, PLEASE READ:

Users expressly agree that use of the MAD GIS: CD ROM is at the user's sole risk. Neither Metro, nor the Oregon Department of Geology and Mineral Industries, nor any of their respective employees, agents, or officers warrant that the information contained herein is error-free, nor do they make any warranty as to the results that may be obtained from use of information or as to the accuracy, reliability, or content of any information provided herein.

Hazard data and their analyses are no substitute for site-specific data collection and analysis.

The relative earthquake hazard zones shown range from zone A, which shows areas of greatest hazard, to zone D, which shows areas of least hazard. The degree of relative hazard was based on the factors of ground motion amplification, liquefaction, and slope instability.

PLEASE REFER TO THE PORTLAND METROPOLITAN RELATIVE EARTHQUAKE MAP PUBLISHED IN 1997 FOR MORE INFORMATION
